ExcelTools

The power and automation of a desktop with the flexibility of a spreadsheet.

MarketView ExcelTools by Drillinginfo delivers both real-time and historical energy market data into Excel spreadsheets allowing users to customize and categorize the data for their own intricate analysis.

Streaming Real-Time and Snapshot Quotes

Track your positions in real-time for instruments such as Crude Oil, Natural Gas, and Heating Oil, or watch the term structure of the market while trading. The MarketView ExcelTools real-time interface gives you access to all of your energy data as it is published, greatly reducing end-of-day reporting time over those vendors who only provide historical data access.

Historical Data

The historical data module allows you to embed deep historical market information into your spreadsheets with automated data filling methods, units and currency conversion, as well as optional chart creation. Historical data is available on an intraday, daily, weekly, monthly, and seasonal basis.

Charts

Insert a historical data table on your spreadsheet and let MarketView ExcelTools automatically format the data as a chart. Choose from numerous time series (intraday, daily, weekly, monthly, seasonal, etc.) and from numerous chart types (bar, candlestick, volume, etc.).

MarketView ExcelTools by Drillinginfo unique features and advantages:

- Standalone component is easy to install via a web browser

- Streams data utilizing Excel Real-Time Data (RTD) components (vs. DDE), for a fast, reliable, and robust interface

- View and analyze your company's own proprietary data such as forward curves

- Ability to work off line – if Internet connection is unavailable, data from last pull will populate spreadsheet

- Real-Time Options Analytics for five different options models

- Perform real-time currency and unit of measure conversion for both quote and historical data

- Navigate exchanges quickly with the MarketView ExcelTools Symbol Tree and Favorites Bar

- Analyze seasonal trends via MarketView ExcelTools seasonal table and chart displays

- Create and access your User-Defined Formulas in both MarketView ExcelTools and MarketView Desktop

- Access Independent System Operator (ISO) electricity/power data

- New software upgrades happen seamlessly in the background

- Receive historic data and quotes from dynamic languages such as VBA, VBS, JScript or Python

PROACTIVE **EFFICIENT** **COMPETITIVE**

By monitoring the market, Drillinginfo continuously delivers innovative oil & gas solutions that enable our customers to sustain a competitive advantage in any environment.

Drillinginfo customers constantly perform above their competitors because they are more efficient and more proactive than the competition.
