Experience the MarketView by Drillinginfo Difference

A Common Data Framework for Your Front and Mid-office.

MarketView Desktop™ and Mobile by Drillinginfo.

Access the most comprehensive collection of global energy and commodity market data in one easy-to-use platform that can be accessed from virtually anywhere. Monitor and analyze real-time, historical, and proprietary data along with breaking news all in one system that also integrates exchange, broker, assessment, OTC and other data sources. Compare datasets, run trend analyses, and create forecasts.

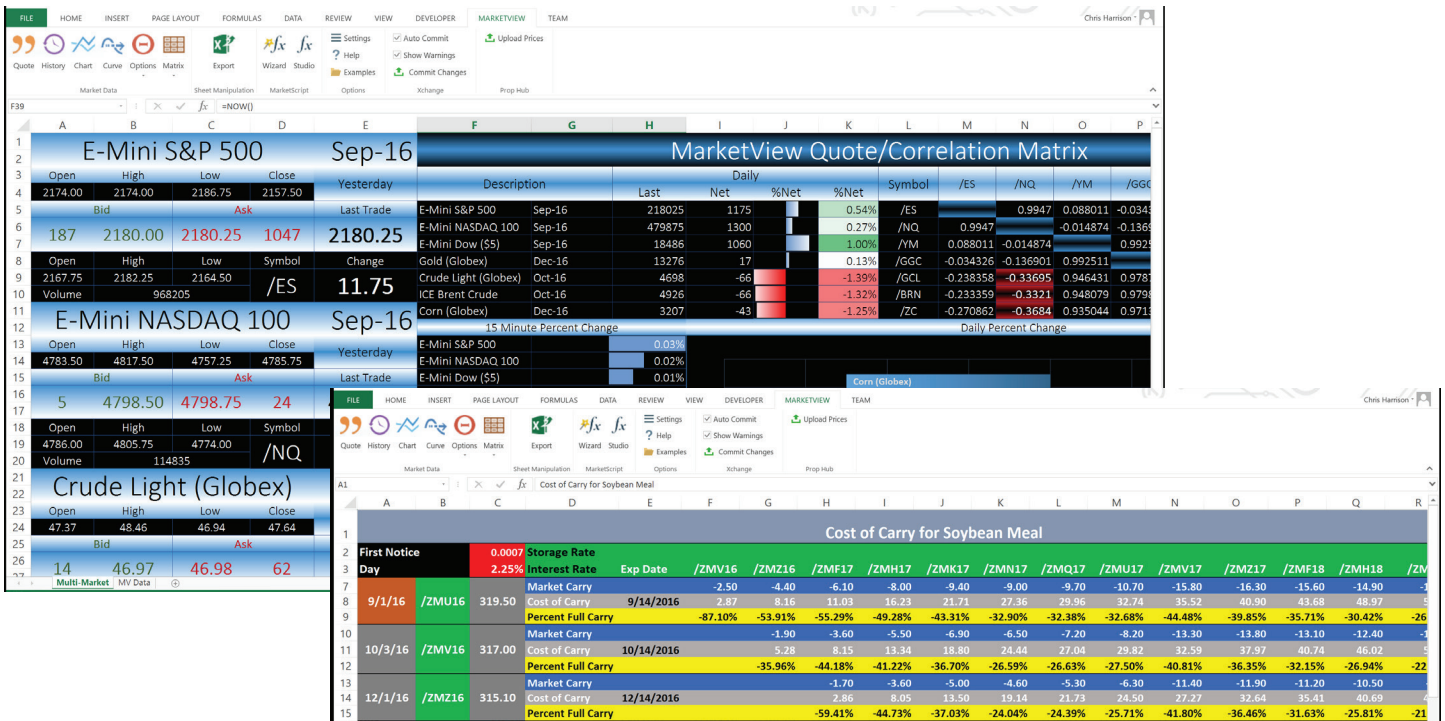

- Multi-paged layouts can be adjusted to meet your needs for monitoring commodity market data and news.
- Easily access and organize your market data with a variety of tools including option analytics, spread calculators, currency cross rate matrices, alerts, forex grids and more.
- Delivered over the Internet as a SaaS-based application, MarketView Desktop is easy to install and maintain.
- Easily access your customer workbook and data from the office, home, or while traveling.

MarketView Mobile by Drillinginfo

Included with your MarketView Desktop subscription, MarketView Mobile by Drillinginfo provides a tailored view of your commodities of choice with charting, quotes, real-time streaming commodity prices and news. This app is available on iOS, Android and BlackBerry devices.

MarketView ExcelTools by Drillinginfo.

MarketView by Drillinginfo ExcelTools delivers both real-time and historical commodity market data into Excel spreadsheets allowing users to customize and categorize data for intricate analysis.

Streaming Real-Time and Snapshot Quotes

Track your positions in real-time for instruments such as Crude Oil, Natural Gas, and Soybean, or watch the term structure of the market while trading. MarketView ExcelTools' real-time interface gives you access to all of your data as it is published, greatly reducing end-of-day reporting time over those vendors who only provide historical data access.

Historical Data

The historical data module allows you to embed deep historical market information into your spreadsheets with automated data filling methods, units and currency conversion, as well as optional chart creation. Historical data is available on an intraday, daily, weekly, monthly, and seasonal basis.

Key Features

- Standalone component installed via a web browser
- Streams data utilizing Excel Real-Time Data (RTD) components
- Create and access user-defined formulas
- Software upgrades happen seamlessly
