## Price Feed for Allegro ETRM Solution

Monitor real-time, historical, and customer proprietary data.

The screenshot displays the MarketView software interface. On the left, a table shows data for Linear Attribution, MTM Change, Counter Party, Trade, and Price. Below the table is a 3D geological model. On the right, a configuration panel for 'GlobalView Price Index' is visible, showing fields for Instrument root, Exchange code, Price index, Expiration Date, Conversion Factor for Pricevalue, Currency, and Globalview Price Index. The Creation Name is listed as Jennifer Boyer.

Linear Attribution	MTM Change	Counter Party	Trade	Price
0	0	Aquila	480714	N
0	292	Aquila	480714	N
0	161,832			N
0	(3,821,168)			N
0	(3,822,210)			N
0	1,043	Aquila	480714	N
0	(3,659,044)			N

**MarketView by Drillinginfo provides a seamless direct interface with Allegro ETRM Solution's PriceConnect component allowing users to monitor real-time, historical, and customer proprietary data with Allegro ETRM system.**

Allegro users can directly access Real-time, End of Day, Historical, and Proprietary data available in MarketView by Drillinginfo for analysis and manipulation within Allegro.

The combination of MarketView's high quality data combined with the power of Allegro ETRM Solution provides a powerful and flexible platform to:

- Manage risk
- Improve position analysis
- Improve trader productivity
- Achieve higher accounting compliance

Drillinginfo has access to wide variety of energy market data from publishers such as Platts, Argus, APPI, RIM, Far East Oil Price Report, etc. Visit our website at [www.gvsi.com](http://www.gvsi.com) to view the full listing of data.

# Key fetures and benefits:

## Features

- Automated forward curve generation
- Direct interface into the Allegro 8 transaction system
- Plug and Play component providing direct data feed of current, futures and forward prices from a multitude of data sources
- Configurable GUI to maintain data interface
- Consolidates data from multiple vendors and data sources

## Benefits

- Instantaneous visibility of positions to best manage company profitability
- Audit capability to ensure accuracy and compliance requirements of source data used to measure derivative valuations
- Reduces likelihood of data entry errors through manual processes or use of spreadsheets
- Consistent price data across all business areas ensuring accuracy and compliance confidence
- A simplified, customizable way to manage price data
- Eliminates or substantially reduces separate data, terminal, software and communication fees from multiple vendors
- Create a zero latency enterprise information-sharing environment

**PROACTIVE**

**EFFICIENT**

**COMPETITIVE**

By monitoring the market, Drillinginfo continuously delivers innovative oil & gas solutions that enable our customers to sustain a competitive advantage in any environment.

Drillinginfo customers constantly perform above their competitors because they are more efficient and more proactive than the competition.
